Living Covers Planted After 2021 Harvest of All Crops (Percent)

Living Cover Planted After 2021 All Crop Harvest

Crop acres calculated from 2021 USDA National Agriculture Statistics Service (NASS) Cropland Data Layer

Windshield surveys were conducted no sooner than 10 days after the first predicted period of 3 consecutive daytime temperatures above 40° F, and therefore do not represent field conditions outside of that time frame. For more information about transect surveys see: https://www.in.gov/isda/divisions/soil-conservation/cover-crop-and-tillage-transect-data/
